Name _____

Finding Distances on a Map

1. You have a map in front of you. Find the scale and write it in the space below.
2. Write in where you are starting from in the "Starting Place".
3. Write in where you are ending to in the "Ending Place."
4. Measure the distance with a ruler and write it in "Units".
5. Calculate how far it by multiplying the units by the scale and that will be your distance. Write the number in "Distance"

Scale: _____

Starting Place	Ending Place	Units	Distance
