

Seasons
Lesson Eight

Outline of the Clark Planetarium
Seasons Activity Kit

This is just an outline of what the activity entails. There is a booklet in the kit to follow that has more details about each instruction.

1. Set up the globes and lights.
2. Ask the questions about the model.
3. Show how this demonstration will work using the light sensors.
4. Give each person a paper for recording.
5. Group into four groups.
6. Tell the jobs of each roles by the showing the procedure how it is to be done. Tell them they will rotate jobs.
7. Have the students go to their stations.
8. Tell them to be careful and accurate by working slowly.
9. Stay on task.
10. You will be given a couple of minutes at each station.
11. Go back to your desks. Copy the information from the main sheet to your sheet.
12. Talk about the results.
