

Clark Planetarium Solar System Fact Sheet 2006

Data provided by NASA/JPL and other official sources. This handout ©May, 2006 by Clark Planetarium (www.clarkplanetarium.org).
 May be freely copied by professional educators for classroom use only. The known satellites of the Solar System shown here next to their planets with their sizes (mean diameter in km) in parenthesis. The planets and satellites (with diameters above 1,000 km) are depicted in relative size (with Earth = 0.500 inches) and are arranged in order by their distance from the planet, with the closest at the top. Distances are not to scale.
