

Universe—Lesson 12

Making a Star Clock

Standard IV: Students will understand the scale size, distance between objects, movements, and apparent motion (due to Earth's rotation) of objects in the universe and how cultures have understood, related to and used these objects in the night sky.

Objective 2: Describe the appearance and apparent motion of groups of stars in the night sky relative to Earth how various culture have understood them.

Indicator d: Relate the seasonal change in the appearance of the night sky in Earth's position.

Directions:

Do the Activity "What Time Is It?"
