

Each of these Zodiac Constellations is behind the sun for about one 30-day time period during the year from Earth’s perspective. They are located on the ecliptic path (orbit) that the planets follow while orbiting the sun. Below are the dates these constellations fall behind the sun as Earth orbits the sun.

Aries (3/12 to 4/19)	Libra (9/23 to 10/22)
Taurus (4/20 to 5/20)	Scorpio (10/23 to 11/21)
Gemini (5/21 to 6/20)	Sagittarius (11/22 to 12/21)
Cancer (6/21 to 7/22)	Capricorn (12/22 to 1/19)
Leo (7/23 to 8/22)	Aquarius (1/20 to 2/18)
Virgo (8/23 to 9/22)	Pisces (2/19 to 3/20)
